Banking Information System

Project Overview

The Banking Information System project is an ambitious endeavor aimed at developing a comprehensive and user-friendly banking application. The primary objective of this project is to create a robust and efficient system that enables users to perform various banking operations securely and conveniently. The project encompasses several essential modules, each designed to fulfill specific functionalities within the banking system

Modules Progress:

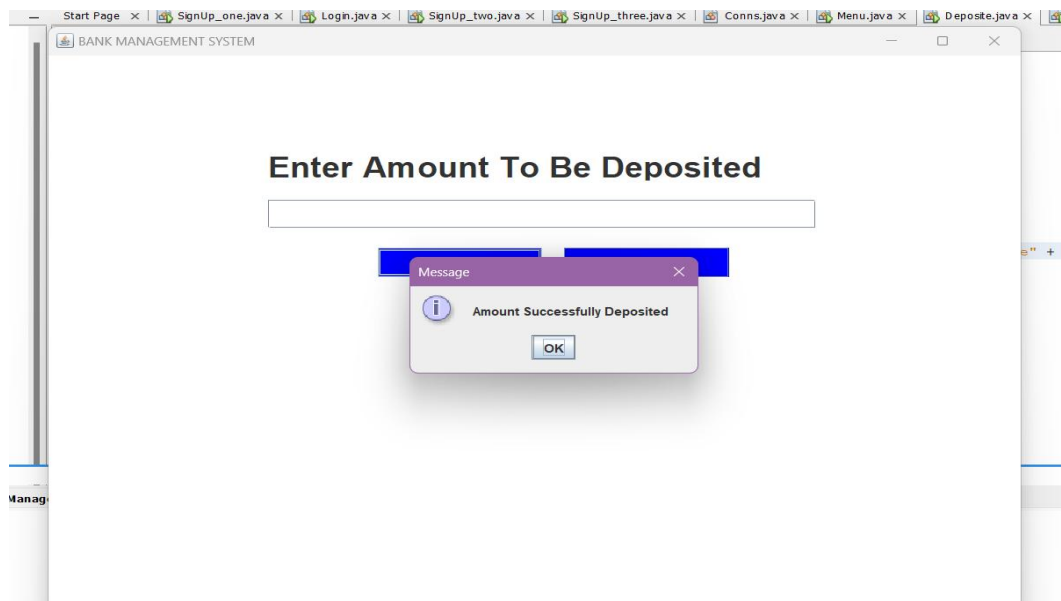

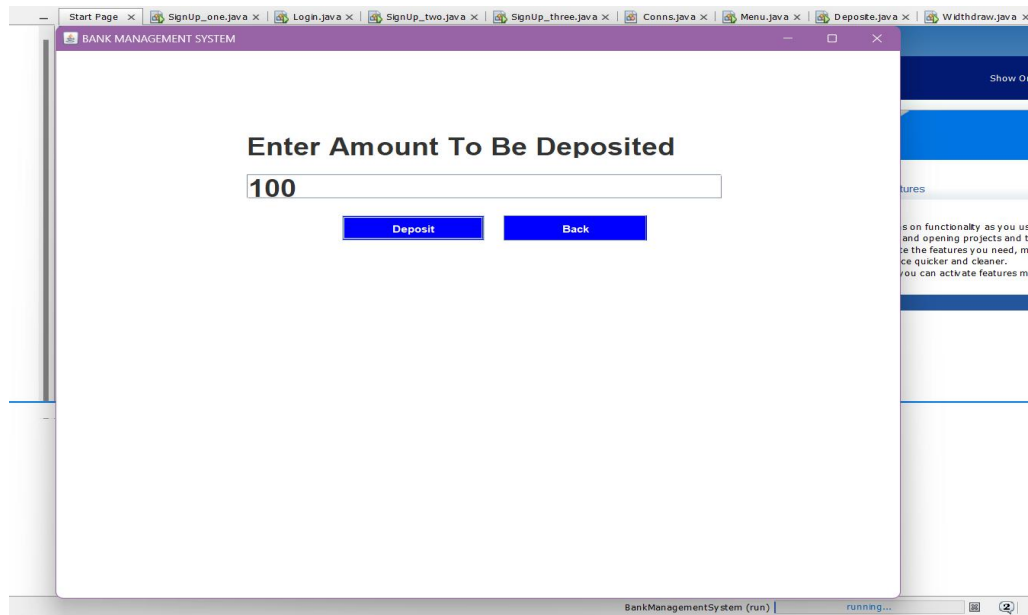

User Registration: User registration has been successfully completed along with database connectivity

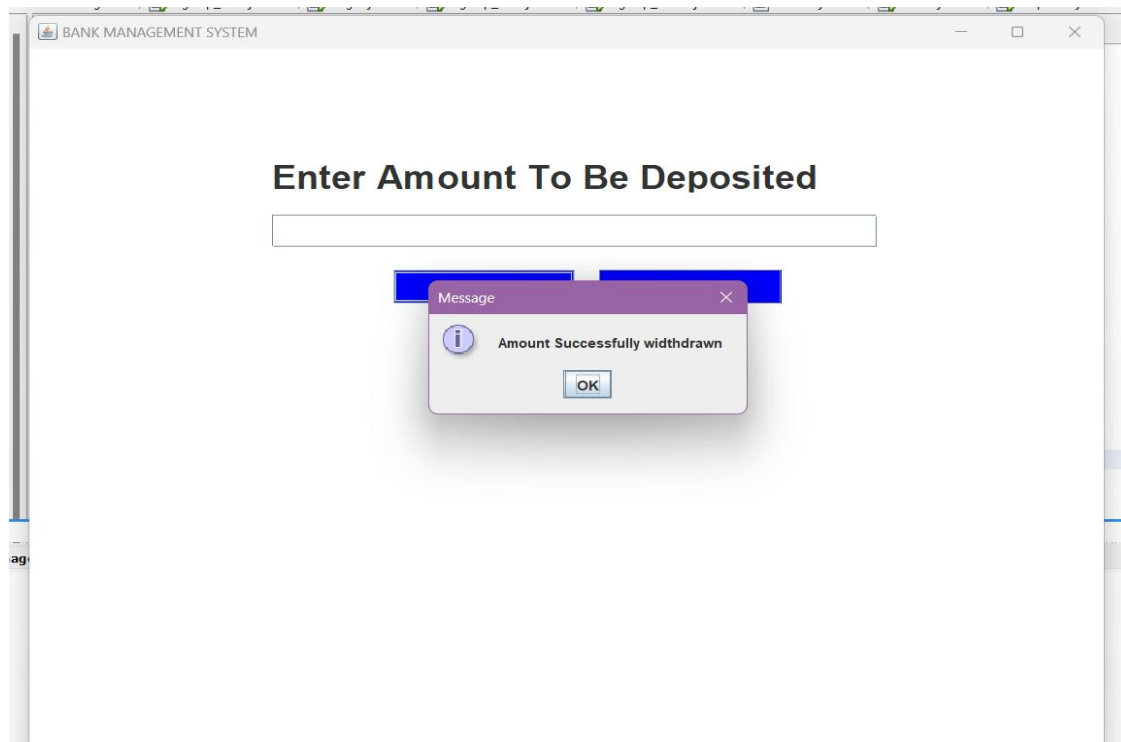

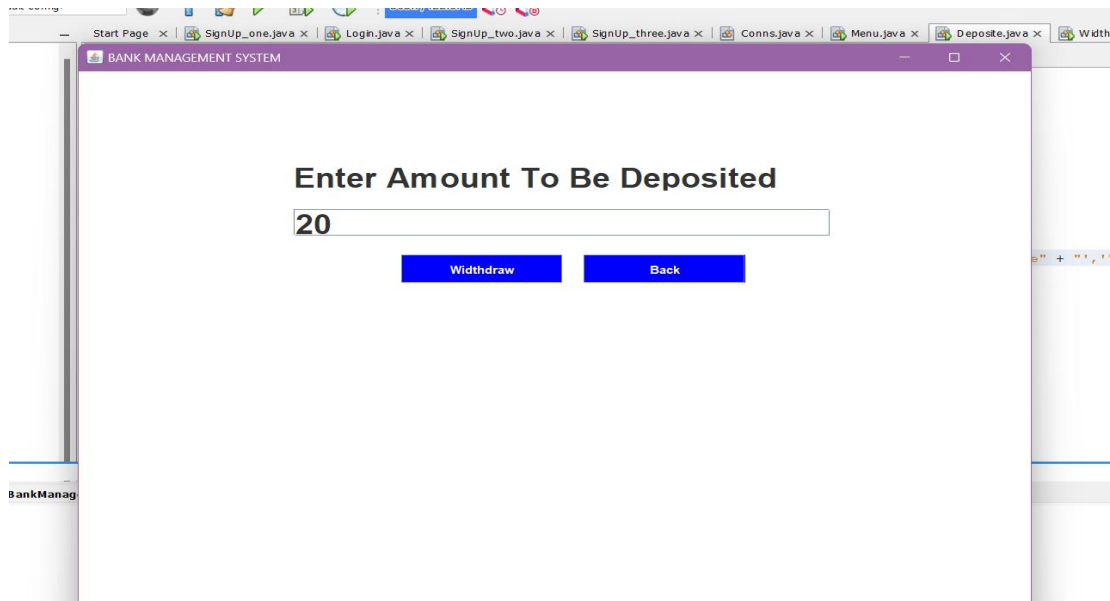

Deposit and Withdrawal: Deposit and Withdrawal has been successfully completed along with database connectivity.

Account Statement : Account Statement module has been successfully completed along with database connectivity.

The screenshot shows a web browser window titled "BANK MANAGEMENT SYSTEM". The browser's address bar contains several tabs: "Start Page", "SignUp_one.java", "Login.java", "SignUp_two.java", "SignUp_three.java", "Conns.java", "Menu.java", "Deposit.java", and "Withdraw.java". The main content area of the browser displays a login form with the heading "WELCOME TO BANK MANAGEMENT SYSTEM". Below the heading, there are two input fields: "Account No:" with the value "2790" and "PIN:" with a masked value "****". Below these fields are three blue buttons: "SIGN IN", "RE-SET", and "SIGN UP".

The screenshot shows the same web browser window titled "BANK MANAGEMENT SYSTEM". The main content area displays the heading "WELCOME TO BANK MANAGEMENT SYSTEM". Below the heading, there are four blue buttons arranged in a 2x2 grid: "Deposit", "Withdraw", "Transfer", and "Mini-Statements".
